Index of Technical and Symposium Papers
Vol. 99, Part 1

TITLES

A

Adaptive Control of HVAC Processes Using Predictive Neural Networks, P.S. CURTISS, J.F. KREIDER, M.J. BRANDEMUEHL 496

Air Sampling System for Monitoring Carbon Dioxide Levels in Buildings, An, R.P. SIEBER, G.J. SCHOENAU, R.W. BESANT 1527

Air Velocity Characteristics in an Experimental Livestock Building with Nonisothermal Jet Ventilation, A.J. HEBER, C.R. BOON 1139

Air Velocity Profiles Around the Human Body, S.KW. CHANG, R.R. GONZALEZ 450

Alternative Venting Techniques for Residential High-Efficiency, Oil-Fired Heating Equipment, R.F. KRAJEWSKI 1186

Analysis of Furnace-Mount Humidifiers for Microbiological and Particle Emissions—Part III: Microbiological Sampling and Results, R.F. UNZ, J.W. DAVIS, C.O. RUUD 1396

Analysis of Furnace-Mount Humidifier for Microbiological and Particle Emissions, Part II: Particle Sampling and Results, C.O. RUUD, J.W. DAVIS, R.F. UNZ 1387

Analysis of Furnace-Mount Humidifier for Microbiological and Particle Emissions—Part I: Test System Development, J.W. DAVIS, C.O. RUUD, R.F. UNZ 1377

Analysis of a Rotary Adsorbent Filter for Indoor Air Quality Control, K.M. KNIGHT, S.A. KLEIN, J.W. MITCHELL .. 811

Application Considerations in Optimal Control of Cool Storage, D.H. SPETHMANN 1009

Application of Direct Digital Temperature Control Systems for Maximum System Efficiency, F.W. MAYHEW 801

Application of Neural Networking Models to Predict Energy Use, M. ANSTETT, J.F. KREIDER 505

Application of Vacuum Pumps and Outdoor Reset Control on a Steam Heating System, The, J.E. PERRY, E.F. DARNER 1291

Assessment of Beam Lighting Systems for Interior Core Illumination in Multi-Story Commercial Buildings, D.N. MIRKOVICH 1106

Atrium Buildings Environmental Design and Energy Use, I. BRYN 1082

Atrium Design Criteria Resulting from Comparative Studies of Atriums with Different Orientation and Complex Interfacing of Environmental Systems, E.O. KAINLAURI, M.P. VILMAIN 1061

Automobile Passenger Compartment Ventilation, R.J. HEINSOHN, W.R. O'DONNELL, J. TAO 476

B

Building Energy Performance and Thermal Comfort in Singapore, K.W. THAM, M.B. ULLAH 308

C

Calculation of Humidity Effects on Energy Requirements of Refrigerated Display Cases (RP-596) (3687), R.H. HOWELL 679

Carbon Dioxide Concentration Based Ventilation Control, F. VACULIK, E.G. PLETT 1536

Characteristics of Diffuser Air Jets and Airflow in the Occupied Regions of Mechanically Ventilated Rooms—A Literature Review, Z.H. LI, J.S. ZHANG, A.M. ZHIVOV, L.L. CHRISTIANSON 1119

Characteristics of Frost Growth on a Flat Plate During the Early Growth Period, Y.-X. TAO, R.W. BESANT, Y. MAO 746

CLTD/SCL/CLF Cooling Load Calculation Method, The (RP-626), J.D. SPITLER, F.C. MCQUISTON, K.L. LINDSEY . 183

CO_2-Based Ventilation Control: Choice of CO_2 Setpoint, K.J. SCHULTZ, B.C. KRAFTHEFER 1548

Cold Air Distribution, Application, and Field Evaluation of a Nozzle-Type Diffuser, D.E. KNEBEL, D.A. JOHN 1337

Cold Air Should be Jet Mixed, Not Distributed, C.D. MACCRACKEN 1333

Commissioning to Avoid Indoor Air Quality Problems, E. STERLING, C. COLLETT, S. TURNER, C. DOWNING .. 867

Commissioning Process: How It Affects the Building Owner and Maintenance Contractor, The, T.D. UNDERWOOD . 863

Comparative Performances of Mechanical Smoke Exhaust System, Zoned Smoke Control, and Pressurized Building Method of Smoke Control, G.T. TAMURA, R.A. MACDONALD 488

Comparison of Boiler Control Strategies for Steam-Heated Multifamily Buildings, A, J.T. KATRAKIS 1265

Compressor Calorimeter Performance of Refrigerant Blends—Comparative Methods and Results for a Refrigerator/Freezer Application, C.K. RICE, J.R. SAND1447

Computational Frameworks for Numerical Assessment of Steady-State Conductive Heat Transfer through Thermal Bridges, A. MAHDAVI 301

Computerized Maintenance Management System in a Railway-Based Building Services Unit, W.Y. FUNG, N.W.H. NG 72

Continuous Monitoring of Fume Hood Face Velocity with a Side Wall Sensor, Z. ZHANG, J.K. AGARWAL 459

Control and Optimization of Rotational Speeds for Rotary Dehumidifiers, W. ZHENG, W.M. WOREK, D. NOVOSEL 825

Control of Outside Air and Building Pressurization in VAV Systems (RP-590), W.W. DELP, R.H. HOWELL, H.J. SAUER, JR., B. SUBBARAO 565

Correlations for Some Saturated Thermodynamic and Transport Properties of Refrigerant R-22, I.R. MARTÍN-DOMÍNGUEZ, T.W. MCDONALD 344

Critical Issues in Comparing Edge-Seal Performance: Modeling vs. Experiment, R.A. FRASER, P.F. DE ABREU, J.L. WRIGHT, H.F. SULLIVAN, H. YAO 923

D

DEAC: Desiccant Enhancement of Cooling-Based Dehumidification, B.G. NIMMO, R.K. COLLIER, K. RENGARAJAN 842

Demonstration of Efficient Humidity Control Techniques at an Art Museum, D.B. SHIREY, III 694

Design and Simulation of a Sub-Optimal Controller for Space Heating, The, M. ZAHEER-UDDIN, R.V. PATEL 554

Determination of Climate Variation within Metropolitan Areas, Phase I Summary (RP-606), K.L. DUFNER, D.T. BAILEY, D.E. WOLFE, S.P. ARYA 430

Determination of Design Loads on Room Heating and Ventilation Systems Using the Method of Zone-by-Zone Balances, E.O. SHILKROT 987

Determination of Rational Control Strategy on Building Space Heating Load, A.L. BURD 545

Development and Evaluation of a Software Package for Self-Tuning of Three-Term DDC Controllers, W.F. HO 529
Development of a Computational Model for a Ground-Coupled Heat Exchanger, T.-K. LEI 149
Development of a Control Strategy for Electrical Demand Limiting Using Absorption Cooling, J.R. JONES, K. BRANDLE, W.N. VERGE 223
Development of a Revised *Cooling and Heating Load Calculation Manual* (RP-626), J.D. SPITLER, F.C. MCQUISTON, K.L. LINDSEY 175
Development of Vent Capacity Tables for Category I Gas Appliances with Fan-Assisted Combustion Systems, D.D. PAUL, G.R. WHITACRE, R.D. FISCHER, A.L. RUTZ, D.W. DEWERTH, R.A. BORGESON, N.P. LESLIE 1163
Displacement Ventilation Systems in Industrial Buildings, J.A. KRISTENSSON, O.A. LINDQVIST 992
Dynamic Analysis and Visualization of Water Vapor Diffusion through Building Components, A. MAHDAVI, K.P. LAM 288
Dynamics and Control of a Chilled-Coolant-Supply System for Electronic Equipment Cooling, H. YASUDA, K. TAKAHASHI, T. DAIKOKU, T. YAMASHITA, T. YOSHIKAWA, S. ZUSHI 535

E

Earthquake Mechanism and Applications for High-Rise Structures, P.J. LAMA 731
Effect of Distribution System Design on Gas Heat Pump Performance, R.L. HEDRICK, W.W. BASSETT 1420
Effect of Electrode Geometry on EHD-Enhanced Boiling of R-123/Oil Mixture, R.A. PAPAR, M.M. OHADI, A. KUMAR, A.I. ANSARI 1237
Effect of Framing Systems on the Thermal Performance of Windows, S.C. CARPENTER, A.G. MCGOWAN 907
Effectiveness of Shading Devices on Buildings in Heating-Dominated Climates, B.D. HUNN, J.W. JONES, M.M. GRASSO, J.D. HITZFELDER 207
Effects of Lubricant on Evaporator Capacity for Systems Using Mixtures of R-12/Mineral Oil and R-134a/Synthetic Oil, The, J.J. GREBNER, R.R. CRAWFORD 380
Effects of Store Relative Humidity on Refrigerated Display Case Performance (RP-596), R.H. HOWELL 667
Electronic Tables for the ASHRAE *Load Calculation Manual*, D.R. FALCONER, E.F. SOWELL, J.D. SPITLER, B.B. TODOROVICH 193
Energy Allocation Equipment for HVAC Systems: A Practical Guide to Its Use and Limitations, R.L. FREISCHLAG ... 880
Energy Conservation and Control Strategies for Integrated Lighting and HVAC Systems, G. SHAVIT, R. WRUCK . 785
Energy Cost Allocation in Multifamily Buildings Using Comfort-Based Allocation Devices, M.A. ANDERSON . 899
Energy-Saving Potential of Precooling Incoming Outdoor Air by Indirect Evaporative Cooling, The, P. CHEN, H. QIN, Y.J. HUANG, H. WU, C. BLUMSTEIN 322
Energy Savings and Field Experience from Converting Steam-Heated Buildings to Hydronic Heat, M.S. LOBENSTEIN, T.S. DUNSWORTH, M.J. HEWETT 1282
Energy Use of Fan-Powered Mixing Boxes with Cold Air Distribution, J.S. ELLESON 1349
Estimation of Outdoor Air Ventilation Rates Using CO_2 Concentrations, K.B. LEVINE, E.M. STERLING, C.W. COLLETT 1554
Ethylene Glycol: Its Use in Thermal Storage and Its Impact on the Environment, E.C. ROGERS, B.A. STEFL 941
Evaluation of Algorithms for Analyzing Smoke Control Systems (RP-618), An, C.P. WRAY, G.K. YUILL 160
Evaluation of Smoking Lounge Ventilation Designs, H.E. STRAUB, P.R. NELSON, H.R. TOFT 466
Evaluation of the Forced-Air Distribution Effectiveness in Two Research Houses, D.H. SAUNDERS, T.M. KENNEY, W.W. BASSETT 1407
Evaluation of the Performance of Attic Turbine Ventilators, J.D. DALE, M.Y. ACKERMAN 14
Evaluation of Thermal Energy Meters as Energy Allocation Devices, S.G. TALBERT, L.J. FLANIGAN, R.A. LORDO, J.E. ORBAN 873
Experimental and Theoretical Investigation of Floor Heating with Thermal Storage, A.K. ATHIENITIS, T.Y. CHEN . 1049
Experimental Investigation of Fluid Flow Mechanisms in Annuli with Spirally Fluted Inner Tubes, S. GARIMELLA, R.N. CHRISTENSEN 1205

F

Fault Detection and Load Monitoring in Ventilation Systems, L.K. NORFORD, R.D. LITTLE 590
Field Performance of Residential Refrigerators: A Comparison with the Laboratory Test (RP-607), A.K. MEIER, R. JANSKY 704
Fundamental Understanding of Surface Sweating, J.C. KHANPARA, E.W. BEHRENS 265
Fundamentals of Optimizing Air Distribution in Ventilated Spaces, M.I. GRIMITLYN, G.M. POZIN 1128

G

Guarded Hot Box Measurements of the Dynamic Heat Transmission Characteristics of Seven Wall Specimens—Part II (RP-515), W.C. BROWN, D.G. STEPHENSON 643
Guarded Hot Box Procedure for Determining the Dynamic Response of Full-Scale Wall Specimens—Part I (RP-515), A, W.C. BROWN, D.G. STEPHENSON 632

H

Heat Emission Rates of Hydronic Terminal Elements and Their Relationship to Heating Cost Allocation Devices, D.R. GOETTLING 888
Heat Transfer at the Edge of Sealed Insulating Glass Units: Comparison of Hot Box Measurements with Finite-Difference Modeling, A.H. ELMAHDY, T. FRANK 915
Heat Transfer Enhancement Resulting from Induction Electrohydrodynamic Pumping of a Single Phase Liquid, B.D. MARGO, J. SEYED-YAGOOBI 1217
High-Efficiency Regenerative Adsorption Heat Pumps, J.A. JONES, V. CHRISTOPHILOS 54
History of Earthquake-Resistive Design for Building Mechanical Systems, J.M. AYRES 719
HOUSE-II Computer Model for Dynamic and Seasonal Performance Simulation of Central Forced-Air Systems in Multi-Zone Residences, The, R.D. FISCHER, R.A. CUDNIK 614

I

Implementing the Commissioning Process, E.E. CHOAT ... 857
Improved Correlation for the Momentum Transfer Characteristics of Spined Pipe, An, R.G. CARRANZA .. 626
Indoor Thermal Environment of Cold Air Distribution Systems, V. HASSANI, T. MALMSTROM, A.T. KIRKPATRICK . 1359
Influence of the Expansion Device on Air-Conditioner System Performance Characteristics Under a Range of Charging Conditions, M. FARZAD, D.L. O'NEAL 3
Influence of Oil on Local Evaporation Heat Transfer Inside a Horizontal Microfin Tube, The, S. HA, A.E. BERGLES . 1244
Innovative Concept to Prevent Moisture Formation and Icing of Cold Pipe Insulation, V. KORSGAARD 270

L

Laboratory Evaluation of an Ozone-Safe Nonazeotropic Refrigerant Mixture in a Lorenz-Meutzner Refrigerator Freezer Design, J.R. SAND, E.A. VINEYARD, V.D. BAXTER 1467
Laboratory Testing of Control Strategies to Reduce Peak Air-Conditioning Loads, J.W. ANDREWS, M. PIRAINO, J. STRASSER 518
Lessons Learned from Monitored Office Building Data, D.J. HERZIG, F.F. WAJCS, JR. 851
Limiting Solar Radiation Effects on Outdoor Air Temperature Measurement, J.K. SONNE, R.K. VIEIRA, A.F. RUDD . . 231

M

Masonry Chimney for Category I Gas Appliances: Inspection and Relining, V.P. KAM, R.A. BORGESON, D.W. DEWERTH 1196
Measurement and Correlations of Frost Properties with Laminar Airflow at Room Temperature over a Flat Plate, Y. MAO, R.W. BESANT, J. FALK 739
Measurement of Pressure-Temperature-Concentration Relations for Mixtures of R-12/Mineral Oil and R-134a/Synthetic Oil, J.J. GREBNER, R.R. CRAWFORD . 387
Measurements of Electrical Power Inputs to Variable-Speed Motors and Their Solid-State Power Converters (RP-667), A. DOMIJAN, JR., E. EMBRIZ-SANTANDER 241
Measuring Method of Oil Circulation Ratio Using Light Absorption, S. SUZUKI, Y. FUJISAWA, S. NAKAZAWA, M. MATSUOKA 413
Method to Account for Energy Conservation Measure Interactions, A, S.W. CROWN, M.B. PATE, H.N. SHAPIRO 201
Modeling of Ice-Storage Tanks, T.B. JEKEL, J.W. MITCHELL, S.A. KLEIN 1016

N

New Refrigerant Drying Method in an Automotive Air-Conditioning System Using R-134a, A, K. KITAMURA, T. OHARA, S. HONDA, H. SAKAKIBARA 361
New Similitude Modeling Technique for Studies of Nonisothermal Room Ventilation Flows, A, J.S. ZHANG, G.J. WU, L.L. CHRISTIANSON 129
Nonlinear HVAC Computations Using Neural Networks, S.I. MISTRY, S.S. NAIR 775
Novel Method for Measuring Water Evaporation into Still Air, A, M.T. PAUKEN, D. TANG, S.M. JETER, S.I. ABDEL-KHALIK 297
Novel Predictive Strategy for Cost-Optimal Control in Buildings, A, J.W. MACARTHUR, W.K. FOSLIEN 1025
Numerical Prediction of Countergradient Thermal Transport in a Turbulent Plume, D.J. BERGSTROM, G.D. STUBLEY, A.B. STRONG 422

P

Parametric Analyses and Optimization of the Performance of an Ammonia/Water Evaporator-Dryer System, R.N. CHRISTENSEN, C. ZHANG, S. GARIMELLA 1503
Performance Characterization of an Engine-Driven Gas Heat Pump in a Single-Family Residence, T.L. CORNELL, R.L. HEDRICK, W.W. BASSETT 1430
Performance Evaluation of Fluted Tube Heat Exchangers, R.N. CHRISTENSEN, P. SAXENA 1511
Performance Evaluation of Naphthenic and Synthetic Oils in Reciprocating Compressors Employing R-134a as the Refrigerant, J.L. REYES-GAVILAN 349
Performance Improvement of Plate Fin-and-Tube Heat Exchangers Under Frosting Conditions, K. OGAWA, N. TANAKA, M. TAKESHITA 762
Performance of Supermarket Air-Conditioning Systems Equipped with Heat Pipe Heat Exchangers, J.M. HILL, A.S. LAU 1315
Physical Properties of Fluorinated Propane and Butane Derivatives as Alternative Refrigerants, A.L. BEYERLEIN, D.D. DESMARTEAU, S.H. HWANG, N.D. SMITH, P.A. JOYNER 368
Pool Boiling Heat Transfer in a Horizontal Narrow Annulus of Lithium Bromide/Water Solution Under a Vacuum, M. HOU, D. OUYANG 661
Pool Boiling of R-11 and R-123 Oil-Refrigerant Mixtures on Plain and Enhanced Tube Geometries, R.L. WEBB, W.F. MCQUADE 1225
Prediction of Mixing Energy Loss in a Simultaneously Heated and Cooled Room: Part 1—Experimental Analyses of Factorial Effects, N. NAKAHARA, H. ITO 100
Prediction of Mixing Energy Loss in a Simultaneously Heated and Cooled Room: Part 2—Simulation Analyses on Seasonal Loss, N. NAKAHARA, H. ITO 115
Principles of Source Capturing and General Ventilation Design for Welding Premises, A.M. ZHIVOV 979
Purge Systems for Absorption Chillers, J.G. MURRAY . . . 1485
Push-Pull Ventilation of Electroplating Tanks, A.G. SAG . . . 971

R

R-22/R-152a Mixtures and Cyclopropane (RC 270) as Substitutes for R-12 in Single-Evaporator Refrigerators: Simulation and Experiments, K. KIM, U.C. SPINDLER, D. JUNG, R.K. RADERMACHER 1439
Receding Horizon Control: A Model-Based Policy for HVAC Applications, J.W. MACARTHUR, M.A. WOESSNER . . 139
Removal of Selected Pollutants from Air during Dehumidification by Lithium Chloride and Triethylene Glycol Solutions, T.-W. CHUNG, T.K. GHOSH, A.L. HINES, D. NOVOSEL 834

S

Simplified Model of Pin Fin Heat Exchangers Under Frosting Conditions, A, S.N. KONDEPUDI, D.L. O'NEAL 754
Simplified Model for Predicting Vertical Temperature Distribution in a Large Space, A, S. TOGARI, Y. ARAI, K. MIURA 84
Simulation of Performance of Chlorine-Free Fluorinated Ethers and Fluorinated Hydrocarbons to Replace CFC-11 and CFC-114 in Chillers, J.C. BARE 397
Study of Energy Use in Grocery Stores, A, R.L. COX, J.S. HABERL, D.E. CLARIDGE 1301
Study of Frosting of Heat Pump Evaporators, F.R. AMEEN . 61
Successful Steam System Operation Strategies, W.T. DEACON 1259
Summary of Analytical Methods and Case Study Monitoring of Atria, A, J.R. JONES, M.B. LUTHER 1070

T

Technique for Evaluating Steady-State Conditions in Flat-Plate Solar Collector Testing, A, M.R. LINDLEY, B.F. PARKER, D.G. COLLIVER, W.E. MURPHY 35
Terminal Regulated Air Volume (TRAV) Systems, T. HARTMAN 791
Test Methods for the Compatibility of Desiccants with Alternative Refrigerants, A.P. COHEN 408
Theoretical Analysis of Replacement Refrigerants for R-22 for Residential Uses, R. RADERMACHER, D. JUNG 333

Theoretical Investigation and Practical Applications of Non-Isothermic Jets for the Purpose of Ventilating Rooms, M.Y. POZ 950
Theory and Practice of Air Distribution with Inclined Jets, A.M. ZHIVOV 1152
Thermal and Acoustical Performance of "Buffer Rooms," A. MAHDAVI 1092
Thermal Comfort and Optimal Energy Use, P. SIMMONDS 1037
Thermal Performance of Chilled-Water Cooling Coils Operating at Low Water Velocities, D.R. MIRTH, S. RAMADHYANI, D.C. HITTLE 43
Thermal Performance of Clean Horizontal Radiant Barriers under Winter Conditions: Laboratory Measurements and Mathematical Modeling, K.E. WILKES, P.W. CHILDS .. 603
Thermal Performance of a Radiant Panel Floor-Heating System, The, J.D. DALE, M.Y. ACKERMAN 23
Thermodynamic Properties of Ammonia-Water Mixtures, O.M. IBRAHIM, S.A. KLEIN 1495
Thermosiphon Heat Recovery from an Air-Conditioner for a Domestic Hot Water System, K.C. TOH, S.K. CHAN .. 259
Total Environmental Quality, D. INT-HOUT 960
Two-Dimensional Natural Convection Over the Isothermal Indoor Fenestration Surface—Finite Element Numerical Solution, D. CURCIJA, W.P. GOSS 274

U

Understanding the Means by Which Your Equipment is Attached, P.R. HOLLENBACH 724
Use of Computer Modeling Techniques to Investigate Aspects Involved in Cold Air Distribution Systems, P.M. ROSE, M.J. SEYMOUR 1366
Using VENT-II to Analyze Venting Installations, A.L. RUTZ, N.P. LESLIE 1180

Index of Technical and Symposium Papers
Vol. 99, Part 2

TITLES

A

Absorption of Vapors into Liquid Films Flowing Over Cooled Horizontal Tubes, S.K. CHOUDHURY, D. HISAJIMA, T. OHUCHI, A. NISHIGUCHI, T. FUKUSHIMA, S. SAKAGUCHI 81

Active Control of Low-Frequency HVAC Fan Noise in Building Systems, S.S. WISE, S.D. GOODMAN, S.H. DINEEN . 1037

Air-Conditioning Electricity Savings and Demand Reductions from Exterior Masonry Wall Insulation Applied to Arizona Residences, M.P. TERNES, K.E. WILKES 843

Air Conditioning with a Combination of Radiant Cooling, Displacement Ventilation, and Desiccant Cooling, U. BUSWEILER 503

Analysis of Moisture Accumulation in Walls Subjected to Hot and Humid Climates, An, D.M. BURCH 1013

Analysis of Stability of Livestock Building Heating/Ventilation Control Systems, Y. ZHANG, E.M. BARBER, H.C. WOOD 237

Analysis on Improvement of Residential Building Performance by Multizone Thermal and Airflow Model, H. YOSHINO, F. HASEGAWA, M. NAGATOMO, Y. ISHIKAWA, N. TOYOHARA 721

Application of Building Automation System (BAS) in Evaluating Diversity and Other Characteristics of a VAV Laboratory, J.A. PARKER, O. AHMED, K.A. BARKER . 1081

Approach to the Calibration of Building Energy Simulation Models, An, J.A. CLARKE, P.A. STRACHAN, C. PERNOT 917

Approximate Numerical Model of Falling-Film Ice Crystal Growth for Cool Thermal Energy Storage, An, W.E. STEWART, JR., R.L. KAUPANG, C.G. THARP, R.D. WENDLAND, L.A. STICKLER 347

Assessing the Capability of the HPSIM Program to Simulate Room Air Conditioners, M.E. MARQUES, C. MELO . . . 309

B

Building Systems for New Automotive Test Cell Facilities, G.M. BIRETA, P.E. BEETON 599

C

Characteristics of Refrigerant-Lubricant Mixtures Containing R-32 and R-32 Blends, S. CORR, F.T. MURPHY, B.E. GILBERT, R.W. YOST 1123

Characterizing Steam and Chilled-Water Use for a Large Campus in Central Texas, J.S. HABERL, R.C. BEASLEY, D.L. THOMPSON 465

Classroom Indoor Air Quality vs. Ventilation Rate, C.C. DOWNING, C.W. BAYER 1099

Cold Air Distribution in Office Buildings: Technology Assessment for California, F.S. BAUMAN, T. BORGERS, P. LABERGE, A.J. GADGIL 109

Combined Impact of Ventilation Rates and Internal Heat Gains on HVAC Operating Costs in Commercial Kitchens, D.J. HORTON, J.N. KNAPP, E.J. LADEWSKI 877

Commissioning: Learning from Experience, C.S. TRUEMAN 947

Commissioning an Industrial Lighting-Daylighting System: Added Value for Cutting-Edge Technologies, J.S. WOLPERT 953

Commissioning and Construction Quality Control—A New Perspective on Facility Commissioning, P.C. TSENG, J. HARMON, F.C. EDWARDS 959

Commissioning for Technical Facilities Management, R.H. ROOLEY 969

Commissioning Hospitals for Compliance, C.N. LAWSON 1183

Comparative Study of Room Airflow: Numerical Prediction Using Computational Fluid Dynamics and Full-Scale Experimental Measurements, A, J.W. WEATHERS, J.D. SPITLER 144

Comparison of Different Calculation Procedures for Cooling Load from Solar Radiation through Window, B. TODOROVIC, L. MARJANOVIC, D. KOVACEVIC 559

Comparison of Methods of Modeling the Air-Side Heat and Mass Transfer in Chilled-Water Cooling Coils, D.R. MIRTH, S. RAMADHYANI 285

Computer Analysis of Moisture Accumulation in the Walls of Manufactured Housing, A, D.M. BURCH, A. TENWOLDE 977

Computer Design of Terminal Heating Substations for District Heating, A.L. BURD 245

Computer Model Calculations on the Performance of Vapor Barriers in Canadian Residential Buildings, A.N. KARAGIOZIS, M.K. KUMARAN 991

Computer Modeling Analysis of Commercial Kitchen Equipment and Engineered Ventilation, D.J. FREY, K.F. JOHNSON, V.A. SMITH, I. MEITLIS 890

Computer Simulation of the Thermal Environment Inside a 275-kV Underground Electric Cable Tunnel, W.K. CHOW, K.C. CHAN, J. IP 277

Considerations in the Rating and Assessment of Low-Frequency Noise, N. BRONER 1025

Control of Low-Frequency Noise in HVAC Air-Handling Equipment and Systems, W.E. BLAZIER, JR. 1031

Cooling Ceilings—An Opportunity to Reduce Energy Costs by Way of Radiant Cooling, M.F. BRUNK 479

Cycle Performance Testing of Nonazeotropic Mixtures of HFC-143a/HCFC-124 and HFC-32/HCFC-124 with Enhanced Surface Heat Exchangers, E.A. VINEYARD, J.C. CONKLIN, A.J. BROWN 97

D

Demonstration of a High-Temperature Heat Pump for Minimizing Liquid Industrial Waste, G.R. GUINN 52

Design Factors for Air-Conditioning Systems Serving Climatic Automobile Emission Test Facilities, L.T. BANNASCH, G.W. WALKER 614

Design of Smoke Control Systems for Areas of Refuge, J.H. KLOTE 793

Determination of Refrigerant Type Using Vapor Thermal Conductivity Measurements of a Controlled Vapor Sample, S. SNYDER, K.W. MANZ 829

Determination of Viscosities of Oil-Refrigerant Mixtures at Equilibrium by Means of Film Thickness Measurements, U.J. JONSSON, E.B. HÖGLUND 1129

Determining the Effect of Lighting on the Thermal Behavior of Buildings Using a Simplified Computer Model with DOE-2, W.S. MASEK, J.A. TICHY 300

Determining Fume Hood Diversity Factors, T.M. RABIAH, J.W. WELKENBACH 1090

Development of High-Efficiency Air Cleaners for Grilling and Deep-Frying Operations, J.N. KNAPP, W.A. CHENEY . . 884
Development of a Measurement System for Multizone Infiltration, N. OHIRA, N. YAGAWA, N. GOTOH 692
Drop-In Testing of R-32 Blends as R-22 Alternatives in a Split-System Air Conditioner (3733), S.N. KONDEPUDI 406
Dynamics of Laboratory Pressurization, O. AHMED, J.W. MITCHELL, S.A. KLEIN 223

E

Economic Analysis of Daylit and Nondaylit Office Buildings in Canada, C.A. JOHNSON, R.W. BESANT 571
Effect of Air Diffuser Layout on the Ventilation Conditions of a Workstation—Part I: Air Distribution Patterns, C.Y. SHAW, J.S. ZHANG, M.N. SAÏD, F. VACULIK, R.J. MAGEE 125
Effect of Air Diffuser Layout on the Ventilation Conditions of a Workstation—Part II: Air Change Efficiency and Ventilation Efficiency, C.Y. SHAW, J.S. ZHANG, M.N. SAÏD, F. VACULIK, R.J. MAGEE 133
Effect of Interior Shade on Window Solar Gain, R. MCCLUNEY, L. MILLS 565
Effectiveness of Cold-Storage Door Infiltration Protective Devices (RP-645), C.C. DOWNING, W.A. MEFFERT . . . 356
Effectiveness Model for Indirect Evaporative Coolers, An, J.L. PETERSON 392
Electrical Conductivity of Pure Organic Liquids, A.L. HORVATH 367
Energy Consumption of a Mixture of R-142b/R-22/R-12 in a Domestic Refrigerator/Freezer, S. WON, R. RADERMACHER 104
Energy Requirements and Potential Savings for Heated Indoor Swimming Pools, C.C. SMITH, R.W. JONES, G.O.G. LÖF 864
Energy Use and Heat Recovery in Water-Loop Heat Pump, Variable-Air-Volume, Four-Pipe Fan Coil, and Reheat HVAC Systems: Part I, J.H. ZAIDI, R.H. HOWELL 13
Energy Use and Heat Recovery in Water-Loop Heat Pump, Variable-Air-Volume, Four-Pipe Fan Coil, and Reheat HVAC Systems: Part II, J.H. ZAIDI, R.H. HOWELL 29
Engine Dynamometer Test Cell Ventilation in Retrofit Facilities, J.D. RICHARDS 609
Evaluation of a Staircase Pressurization System, W.K. CHOW, L.W. LAM 194
Experimental Determination of the Airflow Performance of a Variable-Area Radial Diffuser, J.A. ENGEL, A.T. KIRKPATRICK 759
Experimental Evaluation of an R-32/R-134a Blend as a Near Drop-In Substitute for R-22, K.S. SANVORDENKER . . . 773
Experimental Measurement of Heat Transfer Phenomena in a Solid Adsorbent, S.L. WORM, W.J. WEPFER, S.V. SHELTON 372
Experimental Studies of Air Distribution in a High-Ceilinged Space, W.K. CHAN, Y.W. WONG, G.W. FONG 158

F

Field-Measured Seasonal Efficiency of Intermediate-Sized Low-Pressure Steam Boilers, J.T. KATRAKIS, T.S. ZAWACKI 429

G

Glycol Concentration Requirements for Freeze Burst Protection (RP-493), N.C. CRAIG, B.W. JONES, D.L. FENTON 200

H

Heat Transfer and Pressure Drop Characteristics of R-134a, R-32, and a Mixture of R-32/R-134a Inside a Horizontal Tube, K. TORIKOSHI, T. EBISU 90
HVAC System Effects for Tall Buildings, R.T. TAMBLYN . . 789
HVAC System Provisions to Minimize the Spread of Tuberculosis Bacteria, C.P. ROUSSEAU, W.W. RHODES 1201

I

Idealized Model of Reversed-Cycle Hot Gas Defrosting—Part 1: Theory, An, K.I. KRAKOW, S. LIN, L. YAN 317
Idealized Model of Reversed-Cycle Hot Gas Defrosting—Part 2: Experimental Analysis and Validation, An, K.I. KRAKOW, S. LIN, L. YAN 329
Implementing a Successful Refrigerant Management Program, M. BEATTY 821
Improvement of Multizone Model Predictions by Detailed Flow Path Values from CFD Calculations, A. SCHAELIN, V. DORER, J. VAN DER MAAS, A. MOSER 709
Indoor Airflow and Pollutant Removal in a Room with Desktop Ventilation, D. FAULKNER, W.J. FISK, D.P. SULLIVAN 750
Influence of HX Size and Augmentation on Performance Potential of Mixtures in Air-to-Air Heat Pumps, C.K. RICE 665
Integrated Approach to Laboratory Energy Efficiency, An, W.K. BROWN 1143
Integrated Network Architecture for Heating, Refrigerating, and Air Conditioning, Y. HONDA, M. INOUE, Y. ITO, T. SATO 230

L

Laboratory Methods for Measuring Low-Frequency Sound Emission (RP-624), W.T. CHU, A.C.C. WARNOCK . 1044
Localized Comfort Control with a Desktop Task Conditioning System: Laboratory and Field Measurements, F.S. BAUMAN, H. ZHANG, E.A. ARENS, C.C. BENTON .. 733

M

Measured Performance of Relocated Air Distribution Systems in an Existing Residential Building, M.L. GUYTON ... 855
Measuring and Calculating Laboratory Exhaust Diversity—Three Case Studies, D.T. HITCHINGS, R.S. SHULL 1059
Measuring Fume Hood Diversity in an Industrial Laboratory, J.O. VARLEY 1072
Methodology to Determine Laboratory Energy Consumption and Conservation Characteristics Using an Integrated Building Automation System, A, K.A. BARKER, O. AHMED, J.A. PARKER 1155
Moisture: Its Effects on the Thermal Performance of a Low-Slope Roof System, A.O. DESJARLAIS, J.E. CHRISTIAN, D.M. KYLE, C. RODE 1004

N

Near-Azeotropic Refrigerant Mixtures as Potential Drop-In Substitutes for R-502, W.K. SNELSON, J.W. LINTON, P.F. HEARTY, A.R. TRIEBE 60
New ASHRAE Local Loss Coefficients for HVAC Fittings (RP-551), P.J. BROOKS 169
Numerical Simulation Model for Studying the Thermal Performance of Windows, A, T.F. SMITH, C. BECKERMANN, C.C. ADAMS 585

O

Operating Room Air Distribution Effectiveness, J.R. LEWIS 1191

P

Phase-Change Material Wallboard for Distributed Thermal Storage in Buildings, A.F. RUDD 339
Pumping System Design for Tall Buildings, J.B. RISHEL .. 808

R

R-22 Alternative Refrigerants: Performance in Unitary Equipment, M.W. SPATZ, J. ZHENG 779
Radiant Ceiling Cooling with Solar Energy: Fundamentals, Modeling, and a Case Design, B.I. KILKIS 521
Recommendations for Further Improving Indoor Ventilation Standards, G. GSCHWANDTNER 1116
Recovery, Recycling, and Reclamation Guidelines When Servicing Unitary Air-Conditioning and Heat Pump Equipment, M.G. GARST 825
Results of a Bench Test of the Performance of Refrigerant Recovery and Recycling Equipment, D. CLODIC, F. SAUER 834

S

Sealed-Tube Tests of Refrigerants from Field Systems Before and After Recycling (RP-683), R.E. KAUFFMAN 414
Seasonal Efficiency and Off-Cycle Flue Loss Measurements of Two Boilers, R.W. LANDRY, D.E. MADDOX, D.L. BOHAC 440
Screening Analysis for Chlorine-Free Alternative Refrigerants to Replace R-22 in Air-Conditioning Applications, S.K. FISCHER, J.R. SAND 627
Short-Term Energy Monitoring of Residences, J.D. BALCOMB, J.D. BURCH, K. SUBBARAO 935
Simple Analytical Model for the Design of Vertical Tube Absorbers, A, V. PATNAIK, H. PEREZ-BLANCO, W.A. RYAN 69
Simulation of the Atrium Fire Environment in Hong Kong, W.K. CHOW 163
Simulation of Displacement Ventilation and Radiant Cooling with DOE-2, G. ZWEIFEL, M. KOSCHENZ 548
Simulation of Panel Cooling Systems with Linear Subsystem Model, M. UDAGAWA 534
Skin Temperature and Evaporative Heat Loss Variations for Men and Women in Thermal Comfort, M.P. MODERA . 210
Slab Cooling and Earth Coupling, R.A. MEIERHANS 511
Stability Studies of E245 Fluoroether, CF_3-CH_2-O-CHF_2, R.G. DOERR, D. LAMBERT, R. SCHAFER, D. STEINKE ... 1137
Steady-State Analysis of Single-Speed Residential Split Systems with Zoning Bypass, C. HEFLIN, F.J. KELLER .. 40
Strategies for the Investigation of Indoor Air Quality Problems and Findings from Their Implementation, C.W. COLLETT, J.A. ROSS, E.M. STERLING 1104
System Performance of Near Azeotropic Mixtures of R-134a and R-152a (3732), J.W. LINTON, W.K. SNELSON, P.F. HEARTY, A.R. TRIEBE 400

T

Technique of Sensitivity Analysis Applied to an Air Infiltration Multizone Model, J.M. FÜRBRINGER, R. BORCHIELLINI 683
Testing and Modeling of Fuel Oil Space-Heating Boilers—Synthesis of Available Results, J. LEBRUN, C. SAAVEDRA, F. HORE, M.M. GRODENT, P. NUSGENS . 455
Thermal Comfort and Air Quality in Rooms with Cooled Ceilings—Results of Scientific Investigations, R.W. KÜLPMANN 488
Thermodynamic Evaluation of R-22 Alternative Refrigerants and Refrigerant Mixtures, P.A. DOMANSKI, D.A. DIDION 636
Thermodynamic Properties of Pentafluoroethane (R-125) and 1,1-Dichloro-1-Fluoroethane (R-141b) (RP-654), H.A. DUARTE-GARZA, C.-A. HWANG, R.C. MILLER, B.E. GAMMON, K.N. MARSH, K.R. HALL, J.C. HOLSTE ... 649
Tuning Simulated Building Descriptions to Match Actual Utility Data: Methods and Implementation, W.L. CARROLL, R.J. HITCHCOCK 928
Two-Dimensional Finite-Element Analysis of a Simple Commercial Kitchen Ventilation System, A, E.B. GORDON, N.D. BURK 909

U

Using Occupants' Experiences to Monitor Indoor Air Quality in Office Buildings, J.C. VISCHER 1111
Using Solubility Data for HFC-134a and Ester Lubricant Mixtures to Model an In-Tube Evaporator or Condenser (RP-630), S.J. ECKELS, S.C. ZOZ, M.B. PATE 383

V

Validation of Water-Loop Heat Pump System Modeling (RP-620), R.L.D. CANE, S.B. CLEMES, D.A. FORGAS 3
Variable-Air-Volume Retrofit of an Industrial Research Laboratory, D.L. DOYLE, R.D. BENZULY, J.M. O'BRIEN1168
Variations in Interzonal Airflow Rates in a Detached House Using Tracer Gas Techniques, R.P. SIEBER, R.W. BESANT, G.J. SCHOENAU 699
Verification of Three Energy Estimation Programs for a Low-Energy House, C.Y.S. LI, V.I. UGURSAL 266
